<u>Characteristics</u>	
First Earlies	
Casablanca	
	These are a new white skinned variety with shallow eyes. Very suitable for baking, boiling and chipping.

Duke of York

A heritage variety from 1891. Waxy with a rich flavour when harvested young turning floury when harvested later. Good resistance to dry rot. Best suited to roasting, boiling and salads.

Foremost

When Foremost was first added to the national variety list in 1954 it was called Suttons Foremost. This variety was an instant hit with gardeners who liked its excellent flavour and waxy with resistance to disintegration when boiling. With average sized yields and disease resistance including common scab. Potatoes are short to oval in shape. Very Good for boiling, baking and salad.

International Kidney

Known as Jersey Royals, this heritage variety was first introduced in 1879. It has a pale-yellow skin and creamy flesh with a rich, buttery taste served hot or cold. An all-rounder but especially good when boiled.

Maris Bard

A high yielding variety producing potatoes of a good even size. Good for baking, chipping, boiling and in salads. Good resistance against common scab.

Pentland Javelin

This variety was bred in 1968 and are considered one of the finest first earlies with pure white tasty flesh. It has good all-round disease resistance to common scab and blackleg. Very good for chipping, boiling and in salads.

Red Duke of York

A heritage variety from 1942 that was spotted in a crop of White Dukes in Holland. Red skinned with yellow flesh. These are a dry mealy flavoursome potato that doesn't disintegrate on boiling. Holds a RHS Award of Garden Merit.

Second Earlies

Kestrel

This variety produces potatoes of consistent size and colour. Excellent tasting and best suited to chipping, roasting, boiling, mashing and in salads.

Maris Peer

These tubers are oval in shape with a first creamy coloured flesh and white skin. They have good resistance to all skin diseases. Best suited to baking, boiling and in salads.

Nadine

This variety produces tubers with very shallow eyes with high yields and is particularly suitable for baking, chipping, boiling and mashing.

Wilja

A variety producing consistent crops of light-yellow skinned tubers with yellow flesh. The texture is between waxy and floury making it unusual.

Main Crop

Cara

Red eyed, high yielding and disease resistant. Stores Well, good all round. Excellent drought resistance and good all-round disease resistance. Particularly good for baking, chipping, roasting and boiling.

Desiree

Desiree produces oval red skinned tubers with pale yellow flesh. Heavy cropper and early bulking. High resistance to drought & good resistance to potato virus Y and powdery scab. Susceptible to potato cyst nematode and mis-shapes on heavy soils. Moderately susceptible to spraing and mild mosaic viruses. With a firm cooked texture, good boiling, frying, baking, roasting and mashing quality.

King Edward

King Edward are probably the most famous potato on the market, they are known for their excellent cooking and taste qualities. Once cooked they rarely discolour and offer a broad range of uses. Often copied but never beaten, that is why King Edward have been around for over a century. With part red skin colouration. Good flavour. Boil well. Bake well. Roast well. Chip well. Mash well.

Maris Piper

Maris Piper is extremely popular and well known. It is the cooking and frying qualities of Piper that makes this potato stand out from the rest. The tubers are oval with a white skin and cream coloured flesh. It is also a good long-term storing potato. Uniform in shape and size. Good yield. Good flavour. Boils well. Good chipper. Bakes well. Roasts well. Chips well. Mashes well.

Picasso

Picasso tubers are round to oval in shape with white smooth skins and pink eyes. This is now a popular variety for allotment growers due to its high disease resistance. With Cara as one of its parents it has a great range of uses in the kitchen. A huge yielder and good storing variety. Massive yields. Mild taste. Some resistance to blight. Boil well. Bake well. Roast well. Waxy.

Sarpo Mira

Producing high yields of tasty potatoes which store well. It has great disease resistance and good slug resistance with lots of weed suppressing foliage. Best suited to baking, mashing, chipping and roasting.

Valor

These seed potatoes show great levels of blight resistance matched with the ability to produce large crops of bold white tubers. It has a high tolerance of heat and drought whilst their flesh is cream coloured and of a floury texture. Very good for baking, boiling and roasting.

Salad

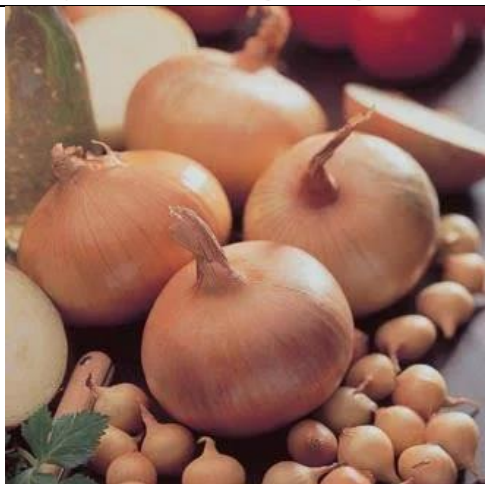

Charlotte

This variety is now the most popular salad potato in the UK. Reliable, high yielding. Waxy long light-yellow tubers. Good flavour. Boils well and good in salads.

Stuttgarter Giant Onion sets

70p for 250g bag

A flat shaped yellow skinned set with good yield and keeping properties. Plant in February. RHS Award of Garden Merit.

Turbo Spring Onion sets

70p for a 250g bag

This superb variety will consistently produce heavy crops of good flavoured shallots that keep well for several months. Plant from February onwards. A great beginner variety.

Red Sun Shallots

£1.50 for a 500g bag

A red variety producing large, tasty shallots with a distinctive spicy taste. The skins are firm and bulbs solid, and they will store for months! Plant from February onwards.

Broad Bean Aquadulce

75p for 125g bag

An improved long podded, white-seeded tasty broad bean that's early to mature. Sow Nov/Dec for an early crop maturing in May to June. Sow Mid Feb for a main crop maturing in June to July.

Broad Bean Masterpiece Green

£75p for 125g bag

These broad beans have long pods with bright green beans of outstanding flavour. Up to 7 beans per pod. Grows well in most conditions – Freezes well and gives an early and heavy crop. Sow Nov/Dec for an early crop maturing in May to June. Sow Mid Feb for a main crop maturing in June to July. The plants grown around 90cm tall and 45cm wide. RHS Award of Garden Merit winner.

Broad Bean Bunyard's Exhibition

75p for 125g

First introduced over 100 years ago. A heavy cropping white seeded type with long pods of 8 or 9 beans. Can grow to 120cm tall and 45cm wide. These beans have a good flavour and freeze well. Sow Nov/Dec for early maturing crop. Sow Mar/Apr for a main crop, maturing Jun/Jul.

Kelvedon Wonder Peas

70p for 125g bag

Thin-shelled pointed, narrow pods in pairs. Heavy yielding and of fine flavour. It is also resistant to mildew and suitable for March-July sowing. An RHS Award of Garden Merit winner. Early variety

Meteor Peas

£1.00 for 125g bag

A very hardy, first early, dwarf variety with small but well filled pods. Excellent flavour and will crop well even in exposed locations, also ideal for containers. Sow in Oct/Nov for an early maturing crop in May. Sow in Mar/Apr for a main crop in Jun/Jul.

Alderman Peas

70p for 125g bag

A tall growing heirloom variety. Vigorous plants produce a heavy crop of long podded peas of excellent flavour. Height 5-6ft. Sow in Mar to May and harvest in July – September.

Enorma Runner Bean

£2.60 for 125g bag

Short-jointed plants producing an enormous crop of very long, smooth, slender beans of excellent shape and colour. RHS Award of Garden Merit winner.

Achievement Runner Bean

£2.60 for 125g bag

A popular, high-yielding variety known for producing heavy crops of long, smooth flavourful, re-flowered pods. It also holds an RHS Award of Garden Merit (AGM) for its reliability and performance. It is a classic, vigorous climber, grown as a half-hardy annual. Plant out after frosts have passed.

French Climbing Beans – Cobra

60p for 45 seeds

The gardener's choice. The pods produced are about 7mm in diameter, long and straight and can be harvested over a long period. They produce stringless smooth pods and have beautiful mauve coloured flowers. Plant out in May-June and harvest in July-September after frosts have passed.

French Climbing Beans – Cosse Violette

60p for 45 seeds

A bean that thrives in warmer weather, when runner beans struggle to set and produce beans. Striking lavender flowers and purple veined leaves. Producing a heavy crop of beautiful deep purple tender and stringless pods which turn dark green on cooking. Pick regularly to produce crops from July to October. Protect from frost and provide support as for runner beans. Good for freezing.

French Climbing Beans – Sunshine

60p for 45 seeds

A warm sunshine loving bean that excels in production over runner beans that can fail to set and produce beans. An attractive variety producing stringless, reliable high-quality crops. The pods have a sweet mild flavour. Picking every few days will enable cropping to last from July to October. Good for freezing. Protect from frost and provide support as for runner beans.

French Climbing Bean Mix – Cobra, Cosse Violette,
Sunshine 60p for 45 seeds

An equal mix of these three varieties that look stunning growing together. Producing tender stringless pods from July to October with regular picking. Protect from frost and provide support as for runner beans. Good for freezing.

Coriander – Calypso Slow Bolt
65p for 10g or 1.55p for 25g

Calypso is a slow bolting Tozer bred variety which is substantially slower to bolt than any other coriander available. In our trials it is consistently 3 weeks slower to bolt than Santos. Plant breeder's rights granted.

Organic Fenugreek - 65p for 10g or £1.55p for 25g

Fenugreek is an annual plant in the family Fabaceae, with leaves consisting of three small obovate to oblong leaflets. It is cultivated worldwide as a semiarid crop. Its seeds and leaves are common ingredients in dishes from the Indian subcontinent, and have been used as a culinary ingredient since ancient times.

Garlic Messidrome – 1 Clove for £1.00

A Soft necked variety, suitable for platting to store with a strong garlic flavour and are easy to peel. Plant individual cloves 3cm deep and 10cm apart, up to the end of January. Harvest when the foliage begins to die down, leave on the surface to ripen.

Garlic Germidour – 1 Clove for £1.00

A Soft necked variety, suitable for platting to store. Originally French but adapted for British conditions. Bulbs have a mild but rich flavour. Plant individual cloves 3cm deep and 10cm apart, up to the end of January. Harvest when the foliage begins to die down, leave on the surface to ripen.

Elephant Garlic – 2 Cloves for £2.20
